

# ISEB 2023 Posters List

<u>First Name</u>	<u>Last Name</u>	<u>Title</u>	<u>Stand</u>
Ariel	Bar Lev Viterbo	Evolutionary trends in the Insect blastoderm	1
Prashant	Tewari	Actomyosin Remodeling Genes and their Role in Sea Urchin Larval Skeletogenesis	2
Daniel	Goloe	Characterizing the Regulation and Molecular Targets of TGF- $\beta$ During Sea Urchin Biomineralization	3
Rony	Karstadt	Revision of the gene-culture model for the evolution of human handedness	4
Erga	Peter	Oh, the places you'll go: selection on dispersal strategy at the range edge	5
Gad	Degani	Transcriptome variation in <i>Ommatotriton vittatus</i> during life cycle adaptation to unpredictable habitats	6
Ophir	Gidron	Quantifying the movement and ecological corridors of the McQueen's Bastard	7
Liran	Sagi	Climate change may lead to directional selection in nesting desert chameleons.	8
Shachar	Perlman	Using network centrality measures as predictors of gene drive deployment outcomes	9
Yoann	Pellen	Exploiting the evolution of odorant discrimination in ants to decipher the olfactory code	10
Adriana	Morales-Guerrero	Ecological and demographic drivers of immune-related genetic variation across human populations	11
Urvashi	Goswami	De novo pyrimidine biosynthesis in Myxosporea (Myxozoa, Cnidaria)	12
Shai	Tamari	Tracking transient gene duplications in natural microbial populations	13
Reem	Abu Rass	Studying the variation in MS2 bacteriophage evolution during serial passaging experiments	14
Moran	Meir	Antagonistic interactions between cheating bacteriophages during long term evolution	15
Guy	Ben Zvi	The impact of domestication on the accumulation of transposable element in the wheat genome	16
Ran	Ashkenazi	Reverse transcription of genes by the Ty retroelement and its impact on evolution	17
Maria	Martignoni	Rapid adaptation through microbiome exchange	18
Nadav	Mishol	Reappraisal of the Middle Pleistocene Homo Fossil Record in Light of the Epigenetically-Reconstructed Denisovan Morphology	19
Isra	Sadiya		20
Or	Amar	A Deep Learning Tool for Predicting Enzymatic Degradation Using Knowledge Graph Embedding	21
Tal	Livny	Exploring the Evolutionary Dynamics of Interspecific Interactions in Microbial Communities	22
Raul	Mireles	Adaptive Laboratory Evolution: A Tool for Prospecting Plastic Degrading Enzymes	23
Sharon	Samuel	Characterizing evolutionary pathways for adaptation to a weak-link enzyme in bacterial populations	24
Yael	Sorokin	Elucidating the effects of eco-evolutionary feedbacks in a bacterial mutualism	25
Tamam	Abdul Ghani	Predicting ant olfactory receptor structures, binding sites and odorant specificity	26
Yael	Admoni	Target complementarity in cnidarians supports a common origin for animal and plant microRNAs	27
Hee-Jin	Kwak	Investigation of antiviral pathway in the sea anemone <i>Nematostella vectensis</i> reveals clues of functional conservation of innate immune system	28
Ari	Meerson	The whole genome variation between the sexes of Russian sturgeon ( <i>Acipenser gueldenstaedtii</i> )	29
Anna	Fassler Bakhman	Distant structural homology among receptor tyrosine kinases in relation to ligand interactions	30
Kira	Kondratyeva	Seasonal and depth distribution of <i>Synechococcus sp.</i> in the Red Sea at the clade and subclade level	31
Felix	Glinka	Effects of different foraging strategies in different climate conditions on the reproductive success in the desert harvester ant <i>Pogonomyrmex barbatus</i>	32
Evgenia	Propistsova	Anatomy of miniature arachnids: a case study of four-legged mites Achaetocoptes (Eriophyidae) and spiders Rayforstia (Anapidae)	33
Srijani	Roy	Exploring the regulatory linkage between the <i>Drosophila</i> SvB and Osi genes	34

## ISEB 2023 Posters List

Areej	Said Ahmad	The genetic basis of trichome loss in <i>D. sechellia</i> .	35
Idan	Sheizaf	The multiple roles of the gap genes network and its evolutionary versatility in hemimetabolous insect development	36
Adrian	Jaimes-Becerra	Functional characterization of venom as a complex trait and elucidation of its contribution to animal fitness	37
Vjaceslav	Tretjacenko	To mistranslate or not to live	38
Yoav	Livne	The effect of the social system on mitochondrial diversity in killer whales.	39
Amit	Jangid	To interact or not to interact: a toy model for the evolution of the protein-protein interaction network in RNase-based self-incompatibility system	40
Evgenii	Potapenko	Exploring the role of genome size variation in evolution	41
Igor	Armiach	More than skin deep: signs of divergence in populations of <i>Lycosa piochardi</i> Simon, 1876 (Araneae, Lycosidae) in Israel	42
Eyal	Haluts	Inferring migration rates from Fst matrices	43
David	sayag	Inferring evolutionary dynamics on incomplete fitness landscapes	44
Nadav	Ben Nun	Inference of CNV rate and fitness effect from yeast evolutionary experiments using neural networks and evolutionary simulations	45
Tehila	Leiman	A new analysis of translation errors in human reveals negative correlation between translation fidelity and genes evolution rate	46
Shu-Ting	You	Mapping genotypes of microbial cooperation	47
Alexandra	Tzipin	Genome structure and social evolution of ants	48
Gil	Wiseglass	How evolution diversifies specific protein recognition	49
Shira	Milo	Unique Expansion of PARP family protein in the <i>Fusarium oxysporum</i> species complex	50
